

St Leonard's College

Digital Technology Program Developer and Teacher

Position Overview

An exciting new position is being formed at St Leonard's College in the field of digital technologies. This role would suit an energetic person who is eager to have the opportunity to help build and extend innovative areas such as Information Technology, Computational thinking, Coding, Robotics and STEM across the College.

This role includes working with a range of other educators to bring new curriculum to life in the classroom. The initial focus would be on the middle years to introduce innovative computational thinking and related engineering skills into the curriculum. The longer term goals are to develop IT across the College from prep to senior levels in both VCE and the International Baccalaureate Diploma Programme.

Part of this role for 2016 will be teaching year 12 IT Software Development, therefore experience in teaching this subject would be looked upon favourably. Graduates are encouraged to apply as are individuals looking to move in to education including those who are currently studying teaching.

General Information

Our teachers are committed to:

- the development of learning and teaching programs with clearly defined outcomes;
- the maintenance of effective assessment recording and reporting strategies;
- the integration of ICT into the classroom;
- meeting all curriculum and assessment requirements;
- engaging in our cocurricular and pastoral programs

The successful applicant will be expected to be involved in cocurricular activities (Saturday sport is not required) and be supportive of the philosophy of an independent Uniting Church school.

The College:

- is an equal opportunity employer
- complies with the requirements of the Privacy Act
- has a strong commitment to OH&S
- will not tolerate harassment of any kind
- has a no smoking policy
- expects a professional standard of dress
- encourages a collegiate and team-centred environment
